

TABLE OF CONTENTS

	Page
AKNOWLEDGEMENTS.....	v
LIST OF TABLES.....	xii
LIST OF ILLUSTRATIONS.....	xiv
ABSTRACT.....	xvi
Chapter	
I. PROBLEM STATEMENT AND PURPOSE.....	1
II. LITERATURE REVIEW	4
Interpretation.....	5
Interpretation and Creating a Place.....	5
Learning about a Place through Interpretive Information on the Internet	6
The Web as a Medium for Interpretation: the Hypertext and Hypermedia Environment	7
Interpretation Qualities on Web Page Design.....	10
Visitors’ Interpretive Experience: Optimal Effectiveness of Interpretation and the Optimal Experience Theory	16
Definitions of Flow	18
Characteristics of Flow	19
Consequences of Flow	19
Measurements of Flow.....	20

Chapter		
	Flow Models in the Literature.....	21
III.	HYPOTHESES: PROPOSED FLOW MODEL IN THE CONTEXT OF A VIRTUAL TOUR WEB SITE	28
	Dimensions	28
	Factors in the Proposed Flow Model for a Virtual Tour Web Site....	30
	Telepresence	30
	Skill and Challenge.....	32
	Flow and its Measurement.....	34
	Consequences of Flow	34
IV.	METHODOLOGY	35
	The Geographical Area.....	35
	Web Site Evaluation Guidelines.....	38
	Developing the Survey Instrument and Testing the Proposed Flow Model.....	41
	Survey Instrument Development	41
	Test the Proposed Flow Model with Structural Equation Modeling Approach	47
V.	EVALUATION OF THE GREAT TEXAS COASTAL BIRDING TRAIL WEB SITE.....	59
VI.	ANALYSIS OF THE SURVEY DATA.....	68
	The Response Rate.....	69
	Demographics of the Respondents.....	70
	Gender Distribution	70
	Respondents' Age.....	71

Chapter

Respondents' Highest Level of Education.....	72
Analysis of the Likert Scale Data	73
Respondents' Geographical Location.....	74
Measurements of Flow Experience.....	75
Measurements of Factors that Contribute to Flow Experience.....	77
Measurements of the Consequences of Flow Experience.....	78
Flow Experience on the Web.....	78
VII. FLOW MODEL DEVELOPMENT WITH STRUCTURAL EQUATION MODELING.....	81
Original Flow Model Specification	83
Data Screening and Preparation.....	83
Univariate Normality	85
Matrix Summary of the Raw Data.....	88
Identification Property of the Structural Equation Model	88
Confirmatory Factor Analysis of the Measurement Model	95
Evaluate the Fit of the Original Measurement Model	98
Evaluating the Fit of Revised Measurement Model A.....	105
Path Analysis of the Structural Equation Model.....	112
Evaluating the Fit of the Initial Structural Model.....	112
Evaluating the Fit of Revised Structural Model A.....	126
Evaluating the Fit of Revised Structural Model B.....	134
Evaluating the Fit of Revised Structural Model C.....	140

Chapter	Page
Evaluating Revised Structural Model D	144
Confirmative Analysis for Revised Measurement Model B..	144
Evaluating the Fit of Revised Measurement Model C.....	149
Composite Reliability of Flow Construct	149
Evaluating the Fit of Revised Structural Model D.....	151
Summary of Model Development.....	157
VIII. RESULTS AND FINDINGS.....	164
Flow and Its Measurements	165
Factors That Directly and Indirectly Contribute to the Flow Experience	167
Experience and its Impact.....	167
Speed	167
Attractiveness.....	168
Ease of Use	169
Interactivity.....	170
Challenge -- Content of the Web Site.....	171
Skill -- Visitors' Domain Knowledge.....	171
Summary of the Direct, Indirect and Total Effect of Factors on Flow Experience	171
Consequences of Flow Experience	172
Learning about a Place.....	172
Changes of Attitude and Behavior.....	173
Summary.....	174

Chapter	Page
IX. CONCLUSIONS, IMPLICATIONS AND RECOMMENDATIONS	182
Conclusions.....	184
Implications of the Findings	186
Implications to the Practice of Web Site Development	187
Implications to the Research on Flow Experience.....	188
Implications for Nature Tourism Interpretation Using the Web.....	190
Implications to the Research in Geography	190
Recommendations for Future Research	191
Attractiveness.....	191
Challenge and Skills in the Environment of the Web.....	192
Subjectivity	193
Techniques for Intuitive Spatial Information Presentation....	193
Research to Validate Findings of this Research	194
 Appendix	
A. SURVEY INSTRUMENT.....	195
B. EMAIL INVITATION MESSAGES.....	198
C. SOME INFORMATION ABOUT THIS RESEARCH PROJECT	201
D. DISTRIBUTIONS OF LIKERT SCALE DATA	202
E. SAS PROGRAMS	226
F. SELECTED OUTPUT PAGES	246
G. OUTPUT FILE FOR THE FINAL STRUCTURAL MODEL D.....	311
REFERENCE LIST.....	392

VITA.....	399
