

## LIST OF TABLES

Table	Page
4.1. Measurements of variables in the proposed flow model .....	49
5.1. Evaluation of the Great Texas Coastal Birding Trail Web site .....	60
5.2. Comparison of the downloading time for five Web sites .....	66
6.1. Cross tables for time distortion (FL1) and enjoyment (FL2).....	80
7.1. Univariate normality of the measurement variables .....	86
7.2. Matrix summaries of the raw data -- covariance matrix .....	89
7.3. Summary of the raw data – correlation matrix .....	92
7.4. Selected fit measures of the initial measurement model.....	100
7.5. Largest normalized residuals for the initial measurement mode .....	104
7.6. Comparison of the actual covariance and predicted covariance of the initial CFA model .....	106
7.7. Comparison of the fit measures for the initial measurement model and revised measurement model A.....	109
7.8. Information needed to compute composite reliability for F8 (skill) in revised measurement model A .....	111
7.9. Selected fit measures for the initial structural model.....	114
7.10. Comparison of the selected fit measures between the original structural model and revised structural model A .....	129
7.11. Comparison of the selected fit measures for the original structural model, revised structural model A and revised structural model B .....	137

7.12	Comparison of the selected fit measures for the four structural models: the original structural model, revised structural model A, revised structural model B and revised structural model C .....	142
7.13.	Comparison of the selected fit measures for measurement model B and measurement model C .....	150
7.14.	Selected fit measures for revised structural model D .....	155
7.15.	Comparisons of the selected fit measures for the four measurement models tested .....	161
7.16.	Comparisons of the selected fit measures for the five structural models tested.....	162
8.1.	Summary of direct, indirect and total effects among factors in the final flow model.....	175
